

8590 PEDESTAL

TO BE USED FOR 8536 CONTROLLERS ONLY.

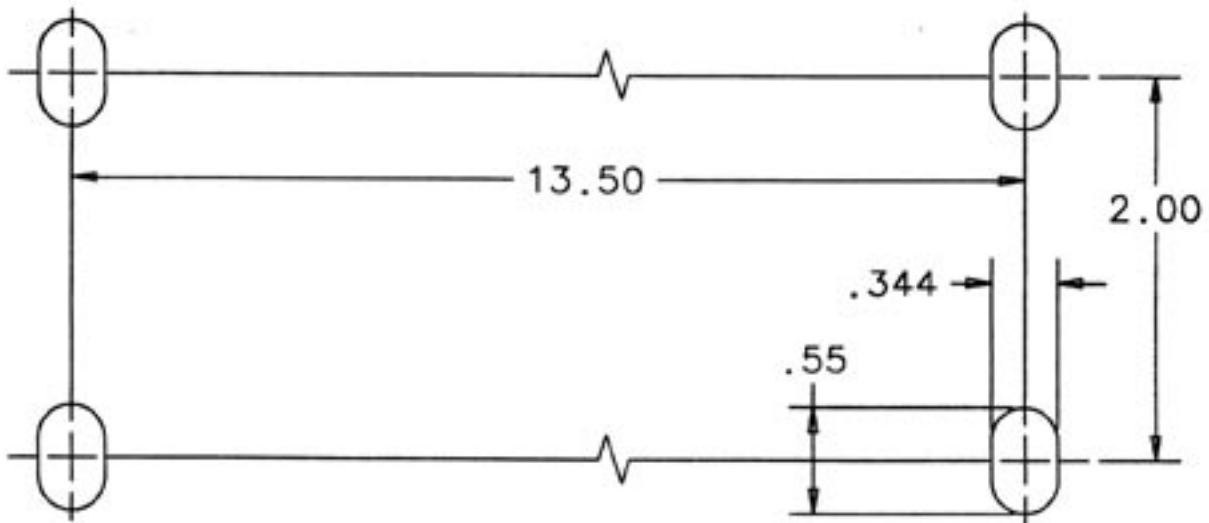

The 8590 pedestal measurements are as follows:

23.25" high by 15.20" wide by 3.98" deep

NOTE: The controller should be placed in an environment not subject to direct sprinkler spray or continuous heavy moisture.

PEDESTAL MOUNTING

Mount the pedestal utilizing the four mounting holes at its base. The holes are 11/32" diameter for the use of 5/16" bolts or lag screws. The holes are positioned as show below.

CONTROLLER MOUNTING TO PEDESTAL

1. Remove door of pedestal by unlocking and tilting it away from the pedestal while lifting it up.
2. Open door of controller and remove painted panel from inside the 8536, for access to conduit holes.
3. Install finishing plug to existing 7/8" diameter conduit hole.
4. Place controller on top of pedestal aligning two holes to top of pedestal. Using center hole, install the 1-1/4" close nipple with locknuts to hold controller to pedestal. Keep controller flush to back flange while tightening locknuts.

INSTALLATION KIT

Modifications to 8536 case - Relocation of AC hole

1. Following template below, add second 1/2" conduit hole ($\phi 7/8"$) to dimension shown.
2. Plug existing hole with snap-in plug. (provided)
